### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1 and 24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, and 4, respectively of U.S. Patent No. 7,002,964. Although the conflicting claims are not identical, they are not patentably distinct from each other because

Regarding claim 1, see entire claim 1 (see claim 1 of the patent 7,002,964 at col. 31, lines 5-21).

Regarding claim 24, see entire claim 24 (see claim 4 of the patent 7,002,964 at col. 31 to col.32).

For claim 1, Applicant merely narrows the scope of claim 1 of the US Patent 7,002,964 by adding the term "object" to data, and the limitation "to transfer the packets from said source node to said destination node via the logical connection set by said controller".

For claim 24, Applicant merely narrows the scope of claim 4 of the US Patent 7,002,964 by adding the term "object" to data, and the limitation "to transfer the packets from said source node to said destination node via the logical connection set by said controller".

It has been held that adding a functional limitation is an obvious expedient if the remaining elements perform the same function as before. Therefore, omission of a reference element whose function is not needed would be obvious to one skilled in the art.

*Allowable subject matter*

3. Claims 28, 43, 46, and 48-49 are allowed.
4. Claims 8, 11, 21, 22, 35, 38, 40, and 41 are objected to as being independent upon rejected base claims, but would be allowable if the rejected base claims file TD.

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lathrop (US 6,512,540); Guo et al.(US 6,173,330) are cited to show data communication system, data communication method, and data communication apparatus, which is considered pertinent to the claimed invention.
